

NEEDLE VALVES

NEEDLE VALVES

The needle valves are not specially designed to isolate the pressure gauge from the pressure line to be measured, since its construction does not allow controlled regulation of the opening of the pressure inlet and therefore does not help to avoid water hammer.

Constructive and functional characteristics

Maximum pressure: The valves are manufactured and tested for a maximum working pressure of 25 bar.

Materials: The material of the body and the closing shafts is carbon steel.

Work temperature: -20...+50 ° C.

Connection to pressure gauge: ¼" ó ½ " Female Gas

Connection to process: ¼" ó ½ " Male NPT

CODE	PUSCH	CONNECTION TO PRESSURE GAUGE	CONNECTION TO PROCESS	HEIGHT
7540240000	2	1/4 " GAS	1/4 " NPT	43,5 mm
7540220000	2	1/2 " GAS	1/2 " NPT	50 mm
